BATH

Specifications - Hydrotherapy heated air spa option

Fill your bathtub with air and offer a truly beneficial massage for those who need it the most.

Totally immersed in the comfort of a powerful yet soothing massage system that is absolutely hygienic and completely **maintenance free**.

Imagine your body pampered by the action of air and heat combined with water to massage and **regenerate sore muscles and relieve pain caused by arthritis, osteo-arthritis, rheumatism and most other health conditions that afflict the elderly and the physically challenged**.

Now **CG Air Systèmes** offers you a totally worry free system, developed and designed for easy access bathtubs.

Our **EAS products** include very high quality and reliable components always keeping in mind the strict hygiene requirements that this industry demands.

All this, combined with **design, performance, comfort and security**, the **EAS products** is the answer to a perfect massage system that will meet all your needs.

At **CG Air Systèmes**, total body comfort through air therapy is a reality within everybody's reach.

AIR JETS

SPECIFICALLY MADE FOR SPECIAL NEEDS!

DURABILITY • DESIGNED, ENGINEERED AND TESTED FOR YOUR PEACE OF MIND

- Solid brass jet body.
- High quality plating procedures.
- High quality exclusive double snap-in check-valve.

RELIABILITY • IT'S GUARANTEED

- The **EAS** air jet technology has been proven and appreciated by our customers since the year 2000.
- Check-valve serviceable within the bathtub.
- Each **EAS** jet check-valve is individually tested following the highest quality control in the industry.

MAINTENANCE

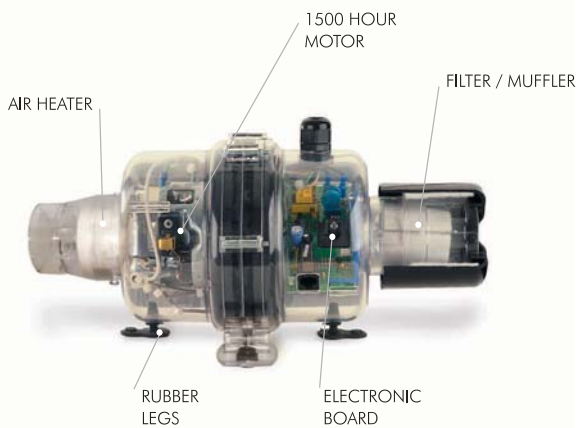

- Nothing to say since none is required. The **EAS** air jet takes care of itself.

TIPS

For an even more therapeutic session, do not hesitate to use soothing scented oils, bath beads, bubble bath (although very sparingly because of the bubbles). Simply rinse and wash the bathtub surface as usual and the purge cycle will eliminate residue.

MILLENNIUM BLOWER

CG AIR SYSTÈMES KNOWS BLOWERS;
BEING THE LEADER OF THE INDUSTRY SINCE 1991.

POWER AND PERFORMANCE

- Power to create a multitude of bubbles for massage to ease all aches and pains.
- Variety of speeds allowing consumers to choose the performance they want for the comfort that they truly need.

HEAT · THE COMFORT OF WARM AIR WITHIN EACH BUBBLE

- 300 watts 1000 unique patented ceramic air heater specially created with the users comfort in mind.

QUIET · THE RELAXING SOUND OF AIR, WATER AND BUBBLES

- The **EAS** blower is equipped with the quietest motor in the industry.
- Filter / muffler kit: filters dust and residue from the air intake of blower to ensure the longevity of the system and reduces the sound of the motor.
- Four rubber feet to ensure stability and absorb vibrations that could be transmitted to the bathtub.

SECURITY · FOR YOUR PEACE OF MIND

- Each **EAS** blower is equipped with thermal protection on both the motor and the air heater.

DURABILITY / RELIABILITY · 3 TIMES THE LIFE SPAN OF ANY OTHER BLOWER ON THE MARKET

- The **EAS** blower is the only blower on the market that has a motor equipped with long life brushes that guarantee **up to 1500 hours** of efficiency and comfort.
- Only high quality materials are installed within each blower by a team of competent technicians carefully following the strictest guidelines.
- The **EAS** blower goes through a multitude of testing procedures by our quality control team before receiving the CG Air Systèmes seal of approval.

PROGRAMMING FUNCTIONS

KEEPING IT SIMPLE BUT TOTALLY EFFICIENT.

EAS CONTROL FUNCTIONS

EASY FUNCTION BUTTONS

- Back to basics, user friendly buttons.

NON STRESS FUNCTIONS

- Another innovative feature from CG Air Systèmes. Keeping in mind the relaxing moment that the bather is enjoying, the non stress functions will change the speed of the blower gradually so that the bather can continue to relax during the change.

AUTOMATIC PURGE CYCLE

Twenty minutes after the system is turned off, the blower will automatically turn on at minimum speed and gradually increase to high speed for a period of 1 minute to completely dry and clean the air system of any water that could remain.

TIPS

Special and unique programming of your very own system is always a possible option. Purge cycle, speeds, additional options, your imagination is our limit.

MINI MANIFOLD

DOUBLE BACK FLOW SECURITY PREVENTION DEVICE.

Specially designed and patented by **CG Air Systèmes** with an innovative and revolutionary technology, the Mini manifold is a 2 level security system combined in one element.

COMPACT SIZE FOR EASY INSTALLATION IN SMALL SPACES

- Replaces the bulky and costly installation of a Hartford loop.
- Available with 4 or 8 outlets.
- Available with 3/8" barbed or 1/2" slip outlets.

ANTI-RETURN CHECK-VALVE

- Opens only to allow the air to be blown through the jets when the air blower is running, and closes as soon as the air blower is shut off preventing any water backflow to the blower.

WATER RELIEF VALVE

- Ensures a second level of protection necessary only if the following circumstances happen simultaneously:
 - The bathtub is over-filled with water.
 - The air blower is not in function.
 - The anti-return check-valve is defective.
- If this happens, the water relief valve will drain the water before it reaches the air blower.

FLEXIBLE PVC HOISING

FROM ONE JET TO ANOTHER...

The 3/8" flexible PVC hosing has been tried, tested and approved by our customers for many years.

- Highly flexible for easy installation, **will not kink** during installation.
- FDA approved.
- Flexible white PVC.
- Withstands temperatures up to 80°C.

MAIN AIR INTAKE HOSE

THE HOSE THAT TAKES YOUR BLOWER ANYWHERE...

- Available in various lengths allowing **easy relocation** of the blower if needed.
- Highly flexible for easy installation.
- Smooth interior to prevent vibrations.
- 1 1/4" end nozzle.
- High temperature and pressure resistant.
